Morning Angus,

I do not feel that any existing private way should be grandfathered. The new ordinance is not taking away anything that they now have. I do not think they should be allowed to use their existing road as road frontage to build a new house. If they want to apply for a new private way permit and meet all the requirements of the new ordinance then all the different problems would be addressed. It would be no different than what would be required of a private way that wants to upgrade to a public way. Thanks.

Alex
